The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-37, 39, 41-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB '777 in view of Meares et al.

GB '277 teaches a cylindrical tube containing capillary tubes at one or both ends for the delivery of actives, including insulin (abstract). A length of 5-100 nm (page 3 line 2) and bore of 0.1-10 mm (page 4 lines 7-8) is disclosed. Titanium is specified (page 3 line 22). Anti-tumor agents are disclosed (page 6 lines 6-7).

Meares et al teaches a bleomycin analog complexed with radionuclides as a diagnostic for tumors (abstract).

It would have been obvious to one of ordinary skill to add the composition of Meares et al to the vehicle of GB '277 to achieve the beneficial effect of a diagnostic for tumors.

No claims allowed.
